

NEW! Navigation Waypoints + FIRs Layer

Introducing new data layers provide relevant navigation aerial data in the platform and take a step towards delivering flight following insights.

Product Specifications

- Waypoints, NAV Aids, and FIRs can be toggled on in the map view.
- Above cloud weather coming soon (est. April 2022) which will enable users to better understand weather at waypoints.
- These features allow us to take another step towards displaying flight plan routes.
- Waypoint and Nav Aids layers replace airport fixes - which you will no longer see in the tool.
- Currently only available in the US.
